## Gustavo Farfan Coraje

---

Lima, Perú • Email: [farfancoraje15@gmail.com](mailto:farfancoraje15@gmail.com) • Phone: +51 910534484 • LinkedIn: [linkedin.com/in/gustavo-farfan-coraje](https://www.linkedin.com/in/gustavo-farfan-coraje)

Software Engineer with over 3 years of experience in backend development, leadership, system architecture, and DevOps practices. Proven track record of delivering scalable and secure software solutions using Laravel, PHP, Node.js, and database technologies such as MySQL, PostgreSQL, and MongoDB. Experienced in API development (RESTful), CI/CD pipelines, and version control with GitHub, Azure Repos. Strong problem-solving skills, detail-oriented, and team player committed to Agile and Scrum methodologies.

### Experience

---

#### Delfosti

Lima, Peru

Backend Developer

February 2025 – August 2025

- Designed and developed a modern ERP system using microservices architecture, ensuring scalability, maintainability, and modularity.
- Implemented RESTful APIs following OpenAPI standards, with automated documentation via Swagger.
- Contributed to the design and maintenance of CI/CD pipelines using Azure DevOps and Azure Repos.
- Collaborated with frontend, QA, and business teams to ensure alignment and high-value iterative delivery.
- Managed backlog and sprint planning using JIRA, coordinating the development team in an agile environment.
- Optimized high-concurrency MySQL and PostgreSQL databases, improving performance and data integrity.

#### Agencia Gato

Lima, Peru

Tech Lead

July 2024 – February 2025

- Led multidisciplinary teams on high-impact projects in finance, agricultural insurance, and retail sectors.
- Facilitated requirements discovery with stakeholders, aligning technical solutions with business goals.
- Oversaw fullstack architecture and deployments on VPS cloud environments, leading automation and security efforts.
- Delivered technical consulting and implementation for Pacifico Seguros, modernizing agricultural insurance management through real-time data systems.

#### Konecta

Lima, Peru

Fullstack developer

November 2022 – May 2024

- Maintained and improved legacy systems based on PHP and MySQL, ensuring operational stability and rapid incident response.
- Developed new functionalities using JavaScript and jQuery, continuously aligning with evolving business needs.
- Led the migration of Claro's technical order system from PHP/jQuery to ReactJS, greatly improving performance, UX, and team efficiency.
- Managed version control with Git and GitHub, led code reviews, and deployed securely to Ubuntu servers via SSH.

#### Labotec

Lima, Peru

Fullstack developer

August 2022 – October 2022

- Responsible for maintaining and scaling web platforms with focus on performance, reliability, and continuous improvement.
- Refactored a telemetry web application to enhance internal architecture, performance, and code maintainability.
- Managed deployments and configurations on Ubuntu-based VPS using SSH in production environments.
- Ensured code quality and traceability through structured Git workflows and peer reviews.

#### Consigue Ventas

Lima, Peru

Backend Developer

March 2022 – June 2022

- Designed, developed, and maintained a high-performance RESTful API aligned with OpenAPI standards and production best practices.
- Built a custom ERP system tailored to commercial operations, optimizing sales, inventory, and logistics processes.
- Coordinated the development team through planning, task assignment, and tracking to ensure timely, efficient delivery aligned with business goals.

### Education

---

- Technological University of Peru – B.S. in Software Engineering (Expected 2026)
- SENATI – Professional Technician in Software Engineering (2019 – 2022)
- ICPNA – English Program (2022)

## Skills

---

### Technical Skills

- **Languages & Backend:** PHP (Laravel), Node.js (Express), Java (Spring Boot), JavaScript, TypeScript
- **Frontend & UI:** React, React Native, Vue.js, Angular, Inertia, jQuery, HTML5, CSS3
- **Databases:** MySQL, PostgreSQL, MongoDB – design, optimization, and management in high-concurrency environments
- **Software Architecture:** Microservices, Clean Architecture, SOLID principles, separation of concerns
- **APIs & Documentation:** RESTful APIs, OpenAPI, Swagger, Postman, SOAP UI
- **DevOps & Infrastructure:** Docker, VPS, Linux/Ubuntu, Nginx, Apache, SSH
- **CI/CD & Automation:** Azure DevOps, Azure Repos, GitHub Actions, Jenkins, custom pipelines
- **Version Control:** Git, GitHub, branch management, code reviews, GitHub Organizations
- **Agile Project Management:** JIRA, Scrum, Kanban, sprint planning, user story definition
- **AI Integration:** Gen AI for automating documentation and technical processes

### Soft Skills

- **Technical Leadership:** Coordination of multidisciplinary teams, technical planning, and decision-making
- **Effective Communication:** Strong collaboration with clients, stakeholders, and remote teams across time zones
- **Strategic Thinking:** Business-oriented approach to automation, scalability, and compliance
- **Adaptability:** Experience across finance, insurance, commerce, and mixed technology stacks (legacy and modern)
- **Problem Solving:** Ability to tackle critical incidents, streamline processes, and implement scalable solutions
- **Autonomy & Initiative:** Independent execution, proactive improvements, and technical ownership

### Languages

- **Spanish:** Native – Excellent oral and written communication
- **English:** Intermediate (B2) – Able to read technical documentation, participate in meetings, and collaborate with international teams
