Software Engineer with 3+ years of experience in backend development, system architectures, and DevOps practices.

Proven ability to lead full-cycle software projects—from technical planning and API development to production deployment—using technologies like Laravel, Node.js, and relational/NoSQL databases. Skilled in server administration (Linux), CI/CD pipelines, and cloud-based deployments (VPS). While primarily focused on backend systems, I also experienced in frontend frameworks such as Vue.js and React. Committed to delivering scalable, secure, and high-quality software solutions through Agile methodologies and cross-functional collaboration.

Experience

Delfosti

Lima, Peru

Backend Developer

February 2025 – Currently

- Developed a scalable and maintainable ERP system using microservices architecture.
- Designed and implemented RESTful APIs following OpenAPI specifications with auto-generated documentation using Swagger.
- Integrated AI-powered tools to automate the generation of technical documentation.
- Contributed to CI/CD pipelines, ensuring continuous and controlled deployments.
- Collaborated closely with frontend developers, QA engineers, and business analysts within Agile frameworks to deliver robust, client-aligned solutions.

Agencia Gato

Lima, Peru

Software Development Coordinator

July 2024 – February 2025

- Lead effort estimation, sprint planning, and coordination of multidisciplinary teams using Agile methodologies.
- Participate hands-on in development, technical design, and deployment of scalable solutions in cloud-based VPS environments.
- Facilitate team alignment with project goals, ensuring timely delivery and quality assurance across all stages of Software development.
- Collaborate with stakeholders to understand business needs and translate them into technical specifications and solutions.

Konecta

Lima, Peru

Fullstack developer

November 2022 – Mayo 2024

- Maintained and continuously improved internal business systems, ensuring platform stability and prompt incident resolution.
- Developed new features based on evolving business requirements, enhancing system functionality and user engagement.
- Led the successful migration of Claro's technical service order system from PHP/jQuery to ReactJS, significantly improving performance, user experience, and development efficiency through modern, scalable technologies.

Labotec

Lima, Peru

Fullstack developer

August 2022 – October 2022

- Maintained and developed multiple web systems, ensuring optimal performance and stability through feature updates and issue resolution.

- Refactored and enhanced a telemetry web application to improve functionality, maintainability, and user experience.
- Managed application deployment on a Linux-based Apache server, handling configuration, maintenance, and updates to ensure reliable and efficient operations.

Consigue Ventas

Lima, Peru

Backend Developer

Marzo 2022 – Junio 2022

- Developed and maintained a RESTful API, ensuring high performance, reliability, and scalability.
- Built a custom ERP system for the commercial department, according to key business processes and operations.
- Integrated core functionalities for sales, inventory, logistics, and customer management, improving overall business efficiency and visibility.

Education

Universidad Tecnológica del Perú

Lima, Perú

Bachelor's degree in software engineering

February 2024 - In progress

SENATI

Lima, Perú

Advanced associate degree in software engineering

February 2019 – July 2022

ICPNA

Lima, Perú

English Program - Intermediate Level Completed

2022

Skills

Languages:

- Spanish (Native)
- English (Intermediate B2)

Technologies & Tools:

- **Backend:** PHP, Laravel, Node.js, Express, MySQL, PostgreSQL
- **Frontend:** JavaScript, TypeScript, React, jQuery, HTML, CSS
- **DevOps & Infrastructure:** Docker, VPS (Linux), CI/CD (GitHub Actions, Jenkins), Nginx
- **APIs & Documentation:** RESTful APIs, OpenAPI, Swagger, Postman
- **Project Management & Methodologies:** Git, Jira, Scrum, Kanban
